2 SD Card Reader	SD Memory Card Reader For accessing media on an SD memory card
3 USB	To connect USB devices such as USB Flash Drive and External Hard Drive (max 500mA load)

Availability of certain features is dependent on your service provider.

## STEP 1: CONNECTING VIDEO

Kamai provides two video options for connecting to your TV: HDMI or Composite Video. Select a video option and proceed accordingly.

Make sure your TV is turned on and the correct video input is selected.

### Option 1: HDMI (Recommended)

If your TV has an HDMI connection, use an HDMI cable (may not be included) and connect Kamai to the HDMI IN port on your TV. This connection provides both video and audio so you do not need a separate audio connection. Proceed to "Connecting TV Source" on page 10.

### Option 2: Composite Video

Use the DIN-to-RCA cable provided and connect the yellow cable to the yellow VIDEO IN port on your TV. Then proceed to the next step ("Connecting Audio") to connect the red/white cables.

If you have already selected HDMI as your video connection, then do not use this cable.

## STEP 2: CONNECTING AUDIO

Kamai has two audio options: Stereo or Surround Sound. Select an audio option and proceed accordingly.

**NOTE:** If you have already selected HDMI as your video connection, then skip this audio section and proceed to "Connecting TV Source".

### Option 1: Stereo

Use the DIN-to-RCA cable provided and connect the red/white cables to the AUDIO IN port on your TV.

### Option 2: Surround Sound

If your TV is connected to an A/V Receiver that supports Dolby Digital 5.1 Surround Sound, use a digital audio cable (sold separately) to connect Kamai to the OPTICAL AUDIO IN port on your A/V Receiver.

### STEP 3: CONNECTING TV SOURCE

Connect an RF coaxial cable (sold separately) from Kamai to either a basic unencrypted Cable TV source or antenna source.

**NOTE:** A built-in tuner for receiving off-air programs is an optional feature of Kamai. Contact your service provider for more details.

### STEP 4: CONNECTING NETWORK

Select from one of the following networking options.

#### Option 1: Wireless

Connect your Kamai to a Wireless Network Router or Access Point.

**NOTE:** Internal Wi-Fi is an optional feature for Kamai. Contact your service provider for more details and instructions about the wireless network configuration.

#### Option #2

Connect an Ethernet cable (sold separately) from Kamai to a cable/DSL modem or Network Router.

## STEP 5: POWERING UP

### Setting Up Remote Control

1. Open the battery cover by pressing down on the battery cover latch and sliding it off.
2. Insert the batteries, matching the "+" and "-" marks on the batteries with the interior of the remote control.
3. Snap on the battery cover to close.

**NOTE:** Refer to the Remote Control Guide for more details about other remote control features.

### Connecting to Power Source

1. Connect the power cord to the POWER port on the back of the Kamai.
2. Plug the AC power adapter to a power outlet.
3. Follow the on-screen instructions.

**NOTE:** Make sure your TV is turned on and the correct video input is selected.
