STEP 1: CONNECTING VIDEO

Kamai provides two video options for connecting to your TV: HDMI or Composite Video.
Select a video option and proceed accordingly.

Make sure your TV is turned on and the correct video input is selected.

Option 1: HDMI (Recommended)

If your TV has an HDMI connection, use an HDMI cable (may not be included) and connect Kamai to the HDMI IN port on your TV. This connection provides both video and audio so you do not need a separate audio connection. Proceed to "Step 3: Connecting TV Source" on page 9.

★★★★★

HDMI
HIGH-DEFINITION MULTIMEDIA INTERFACE

Delivers the best video & audio quality via a single cable

Cable is optional and may not be included

HDMI IN

Option 2: SCART Video

Use the DIN-to-SCART cable provided and connect the SCART connector to the SCART IN port on your TV. This connection provides both video and audio so you do not need a separate audio connection.

★★

SCART
Delivers good picture quality

If you have already selected HDMI as your video connection, then do not use this cable.

Proceed to "Step 3: Connecting TV Source" on page 9.

Cable included

STEP 2: CONNECTING AUDIO

Kamai has two audio options: Stereo or Surround Sound. Select an audio option and proceed accordingly.

NOTE: If you have already selected HDMI as your video connection, then skip this audio section and proceed to CONNECTING TV SOURCE.

Option 1: Stereo
Use the DIN-to-SCART cable provided and connect the SCART connector to the SCART IN port on your TV.

Option 2: Surround Sound
If your TV is connected to an A/V Receiver that supports Dolby Digital 5.1 Surround Sound, use a digital audio cable (sold separately) to connect Kamai to the OPTICAL AUDIO IN port on your A/V Receiver.

Cable not included
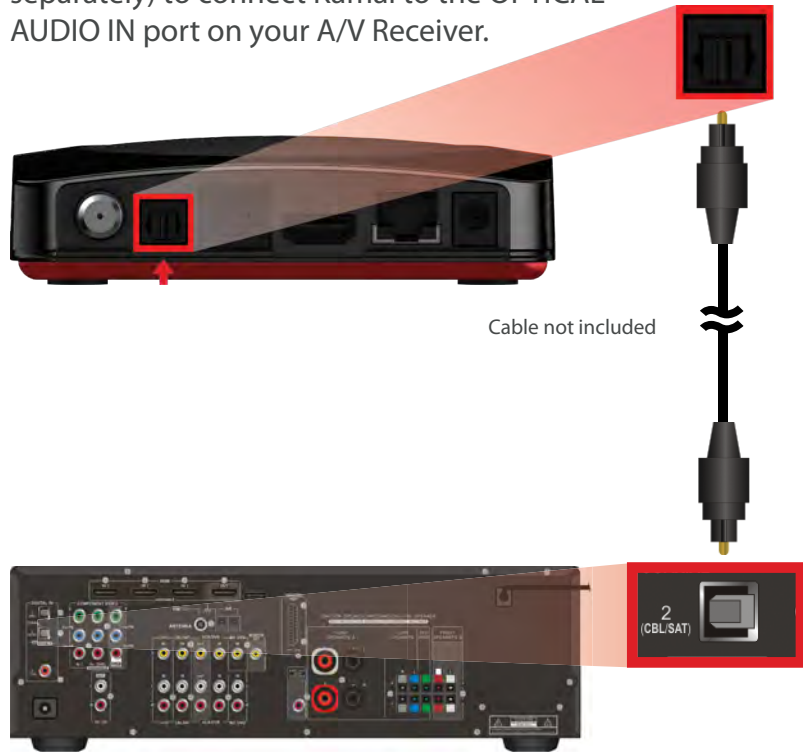

STEP 3: CONNECTING TV SOURCE

Connect an RF coaxial cable (sold separately) from Kamai to either a basic unencrypted Cable TV source or antenna source.

NOTE: A built-in tuner for receiving off-air programs is an optional feature of Kamai. Contact your service provider for more details.

Cable not included
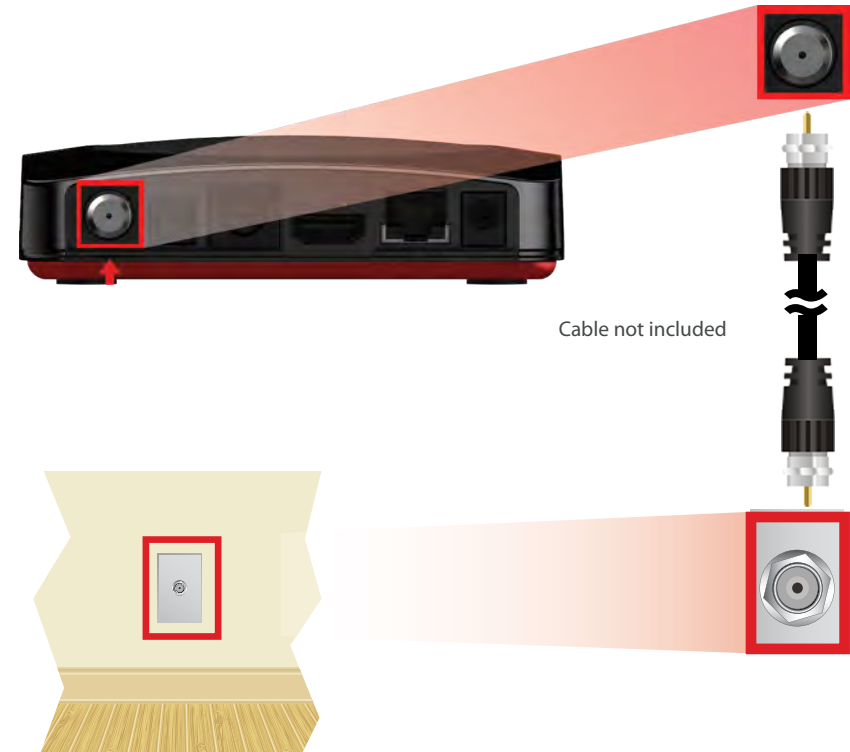

STEP 4: CONNECTING NETWORK

Select from one of the following networking options.

Option 1: Wireless
Connect your Kamai to a Wireless Network Router or Access Point.

NOTE: Internal Wi-Fi is an optional feature for Kamai. Contact your service provider for more details and instructions about the wireless network conﬁguration.

Option #2
Connect an Ethernet cable (sold separately) from Kamai to a cable/DSL modem or Network Router.

Cable is optional and may not be included
